

Team: Topic Miner

Member/Captain: Kristina Hill (kdh5)

Which tasks have been completed?

- [1h] Dataset acquisition and enablement, videos and transcripts from the UIUC Text Analytics Coursera course

Which tasks are pending?

- [3h] Segment dataset and explore topic of video segments in the current minute-long video segments
- [2h] Examine paragraph breakpoints in video transcripts - explore topic within segments
- [6h] Implement Gensim method of developing topic clusters
- [5h] Translate results of Genesis topic segmentation into video timestamps and incorporate empirical feedback to compare timestamps with current minute-long segments.
- [2h] Compare user-friendliness of timestamps created with all three methods and provide empirical feedback.

Are you facing any challenges?

Yes, I'm quite behind in the course. I hope to use the Thanksgiving holiday to catch up on course quizzes and this project. Wish me luck :)
